Subject: Structure on Shoreline of Lunada Bay

Hi Sheri,

Here is another unauthorized encroachment. There is a permanent deck/patio and roof structure located along the coastline of Lunada Bay adjacent to Rocky Point Road. Pete believes this structure was built approximately 25 years ago and has been modified though the years.

Besides the fact that it is an illegal structure, I have also received a complaint that the area where this structure is located is off limits to non-locals (surfers).

I just received a call from an individual who says he has 50 volunteers ready to demolish the structure and remove the debris.

The photos below were copied from a facebook website and google earth.

Perhaps we can talk more about this at today's staff meeting.

-Joe
